

Southern Choice

PRIMARY USAGE

Athletic Fields
Home Lawns
Golf Courses

MIXTURE OR BLEND

90% Turf-Type Tall Fescue
10% Proprietary Bluegrass

SEEDING RATES

New Seeding 8-10 lbs. per 1000 sq. ft. (homes);
15-18 lbs. per 1000 sq. ft. (sports fields)
Overseeding 4-5 lbs. per 1000 sq. ft. (homes);
9-11 lbs. per 1000 sq. ft. (sports fields)

Southern Choice is a blend of turf-type tall fescue and bluegrass for sports fields, golf courses and home lawns. Varieties selected for this blend are chosen for their excellent heat and drought tolerance, ability to withstand wear, and low maintenance requirements. This blend is recommended for areas south of I-80.

Southern Choice responds to lower fertility rates, 0.5-3 lbs. of nitrogen per 1000 sq. ft. per season. It can be used successfully as an initial seeding or to overseed. It should be maintained at mowing heights of 3"-5"
