

Tough Lawn

PRIMARY USAGE

Home Lawns
Landscaping
Football or Soccer Fields
Low Maintenance Areas
Sun to Partial Shade

MIXTURE OR BLEND

100% Proprietary Turf-Type Tall Fescue

SEEDING RATES

New Seeding 4-6 lbs. per 1000 sq. ft.
Overseeding 2-4 lbs. per 1000 sq. ft.

Tough Lawn is a unique blend of proprietary turf-type tall fescues designed to handle high traffic and low maintenance. It will tolerate heat stress and drought stress better than most other turf blends. **Tough Lawn** grows well in a variety of soil conditions under low management with very good color and good disease resistance.

Tough Lawn responds to lower fertility rates, 0.5-4 lbs. of nitrogen per 1000 sq. ft. per season. It can be used successfully as an initial seeding or to overseed. It should be maintained at mowing heights of 3"-5"
